INHALT

Willkommen zum Booklet des zweiten Semesters!

Im Vergleich zum vorhergehenden Wintersemester wurden dieses nur 4 Aufgaben, inklusive dieser Dokumentation bearbeitet. Diese soll das Semester mit seinen Aufgaben nochmals visuell veranschaulichen.

ICONDESIGN

7 Icons für eine
Nachhaltigkeits-App

01

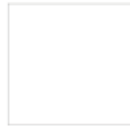

Zu Beginn
des Semesters
bestand unsere
Aufgabe darin
7 Icons für eine
App zu erstellen.

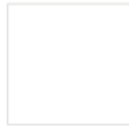

Hierbei wurden
zuerst handliche
Skizzen erstellt,
die danach digital
umgesetzt wurden

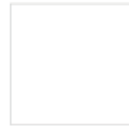

Auswahlmenü

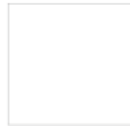

Klimaschutz

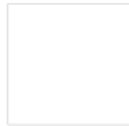

Artenvielfalt

Politik

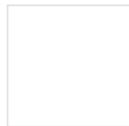

Achtsamkeit

Ökosystem

Ressourcen

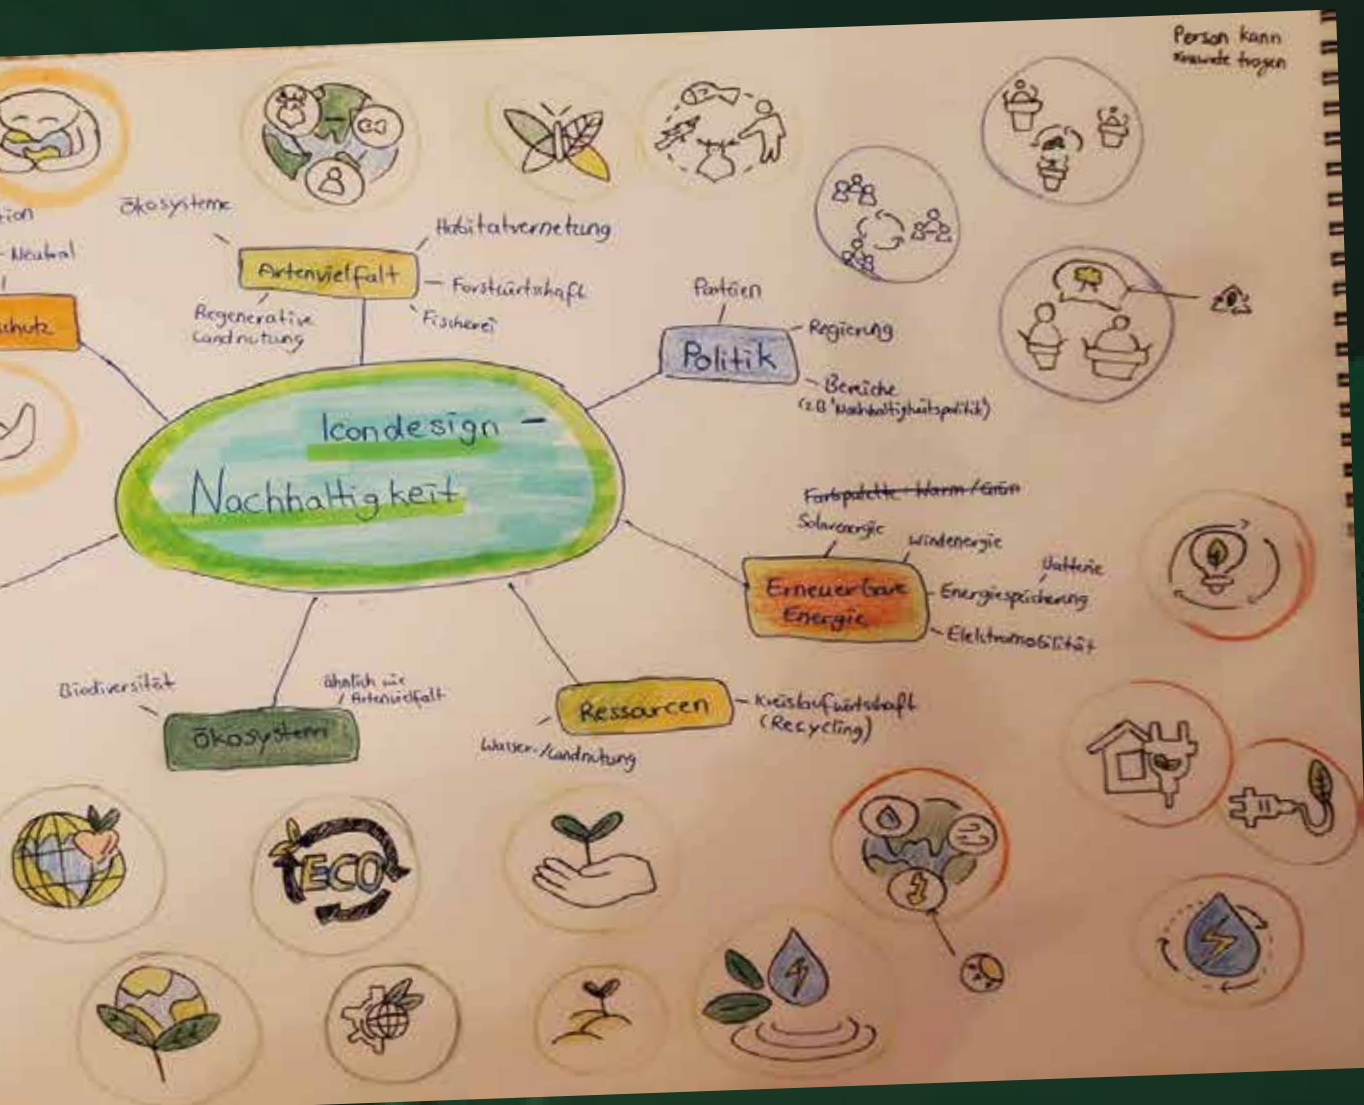

Erneuerbare Energie

Blockzeichnungen

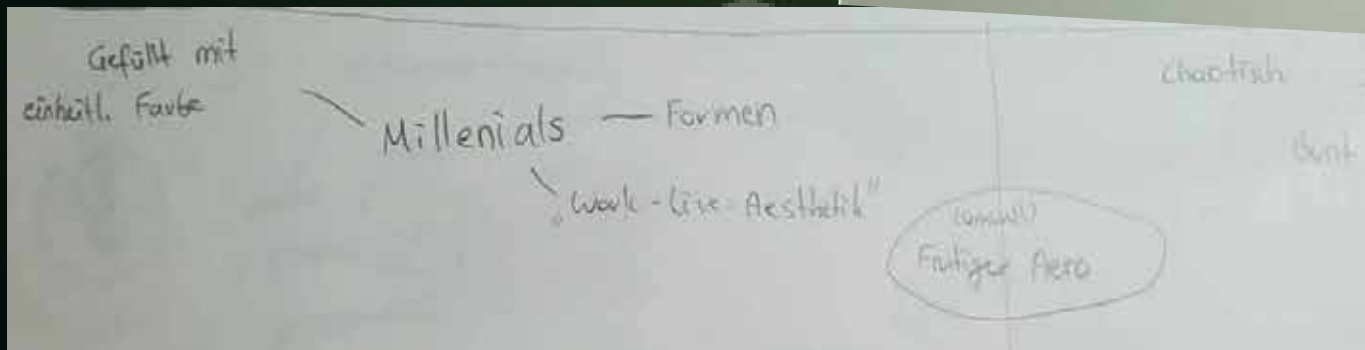

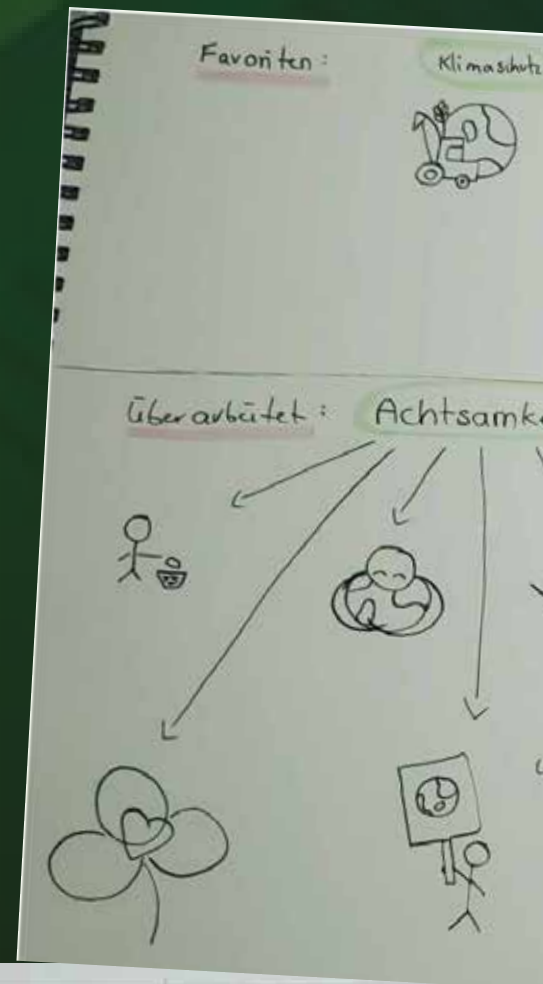

Zu Beginn habe ich zu den jeweiligen Themen passende Begriffe gesucht, um den Bereich besser veranschaulichen zu können

Dann wurden auch schon die ersten Icons gemalt, die diesen Bereich repräsentieren sollen

Nach vielerlei
Feedback
wurden Favoriten
festgelegt
und Gedanken zu den
Zielgruppen gemacht

Artenvielfalt

Blatt + Flügel

Erneuerbare
Energie

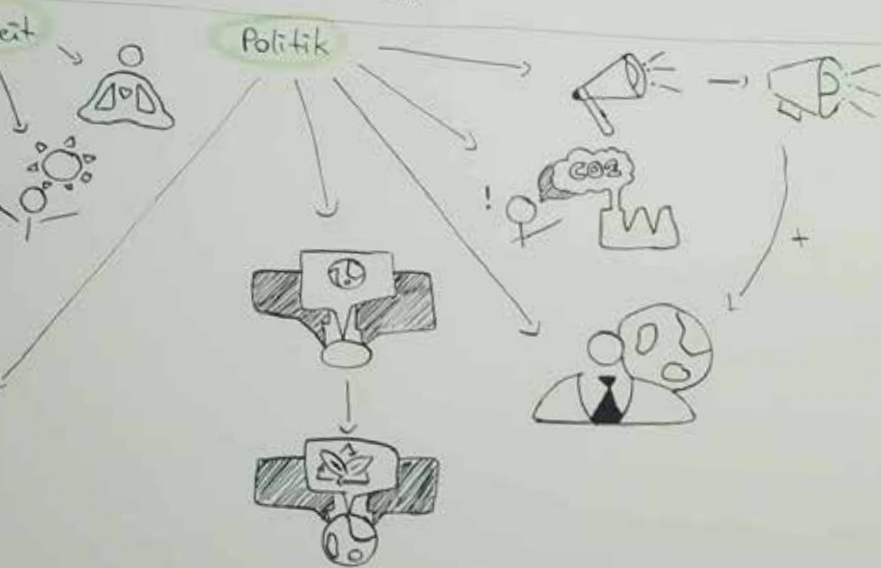

Ressourcen

Ökosystem

Politik

Schüler

Vielfältig

Funktion

Schulästhetik

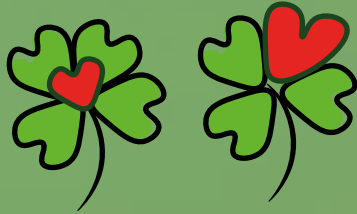

Auf den folgenden
Seiten befinden
sich die nachgebauten
Icons aus den
Skizzen mit ihren
jeweiligen Moodboards,
die mir dabei halfen die
Zielgruppe besser
darzustellen

SCREENDESIGN

Redesign des Interfaces
unseres Druckers an der TH

02

Die zweite Aufgabe bestand darin
ein neues Layout für den Drucker
an unserer THI zu entwerfen

Damit mir dies gelungen konnte
beschloss ich das Original bis
in seine kleinsten Bestandteile
herunterzubrechen und
diese von Grund auf
im passenden
Style der THI
wieder aufzubauen

Hier finden sich die
zu rekreierenden
Screens des Druckers:

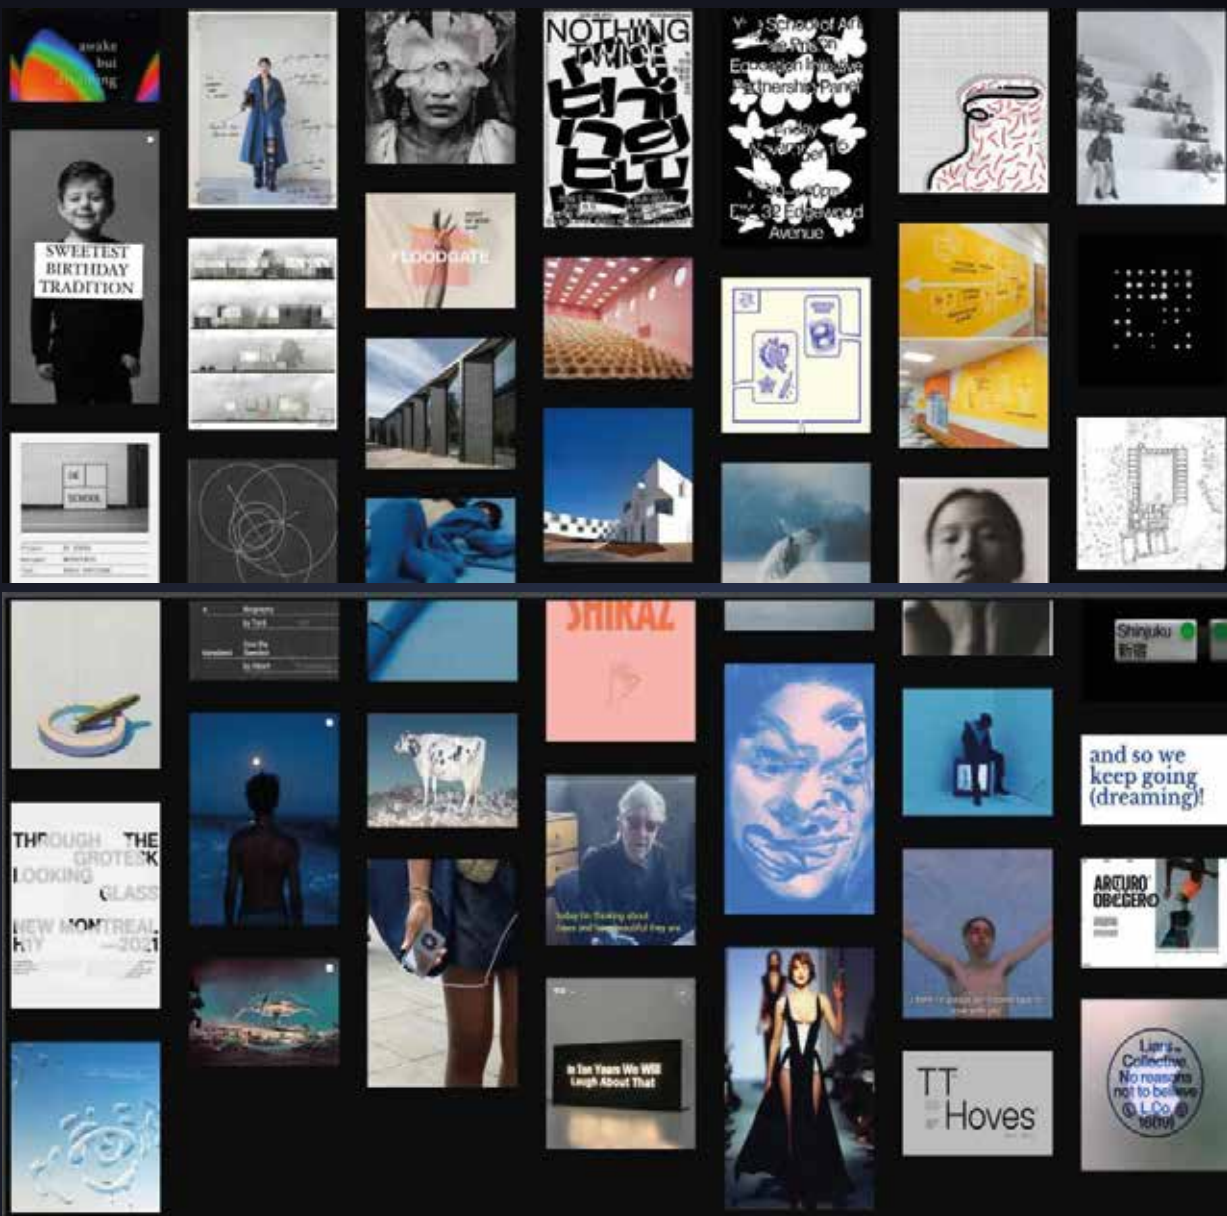

SCAN ME

Moodboard

Für das Moodboard habe ich mir
auf folgender Seite einen eigenen Thread
erstellt, um vielerlei Inspiration zu erhalten:

<https://www.cosmos.so/juja.com/thi>

Styleguide

Zu Beginn habe ich das originale Layout zerlegt und mit originalen Icons aufgefüllt. Für diese habe ich mich zudem weiterhin informiert.

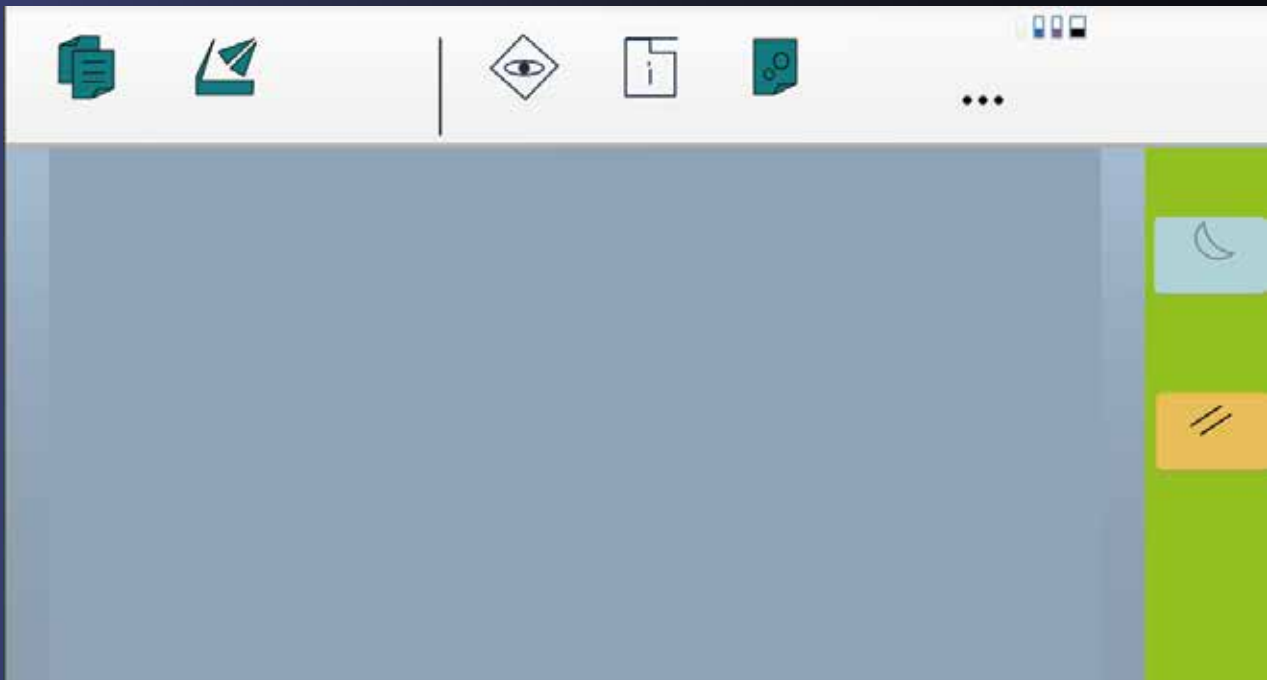

Originales Layout

Potenziele Icons

originales Layout mit Icons

Nun habe ich
alle bisher
erarbeiteten
Elemente zu
einem Screen
vereinigt und
eigene
Überlegungen
integriert, ohne
Rücksicht auf
eine einheitliche
Farbpalette zu
nehmen, da
hier das UI
ausschlaggebend
ist.

Nach genauerer Betrachtung und reichlichen Feedback habe ich eine Handvoll an Veränderungen vorgenommen und somit das finale Design geschaffen.

Dieses Design konnte ich
mithilfe von Figma in
einen interaktiven Prototypen
umbauen, der sich unter folgendem
QR-Code finden lässt:

Endentwurf

Den Buttons wurde durch ein Übergang mehr Dimension verliehen.

Es wurde eine einheitliche Farbpalette im Styl der THI übernommen.

Die vielzahl an Icons wurde auf ein Minimum reduziert

Mithilfe von verschiedener Deckkraft wurde eine visuelle Hierarchie geschaffen

Um zu diesem Ergebnis zu gelangen musste ich somit viele Schritte wagen, die zum Teil auch in die Lere geführt haben, jedoch wichtig für den positiven Verlauf des Prozesses waren.

INFORMATIONEN VISUALISIERUNG

Ein informatives Plakat
über Frauen in der Informatik / IT

03

G

In der letzten Aufgabe
für dieses Semester
sollte ein Din A1 Plakat
erstellt werden.

Es enthält Informationen
über Frauen in
der Informatik / IT mit
eigens gewählten
Schwerpunkt.

Dieses sollte, falls es den
Anforderungen entsprochen
hat in den
jeweiligen Gebäuden
ausgestellt werden.

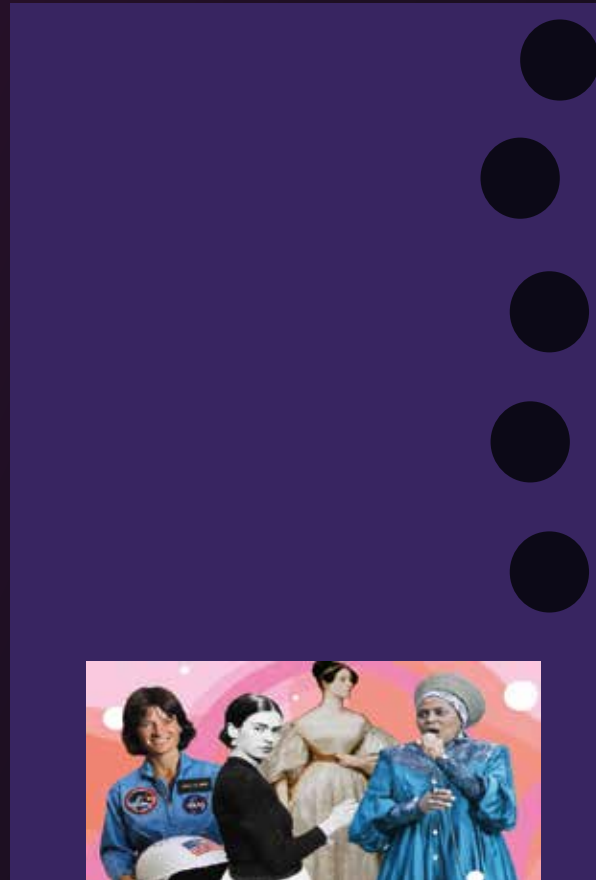

Ideenaufbereitung

Meine erste Überlegung war eine Darstellung der Meilensteine von Frauen in der IT.

Ich wollte eine Vielzahl an Informatikerinnen unten anordnen und ein paar Gesichter am Rand platzieren wie aufsteigende Blasen.

Eine weitere Überlegung war es eine Art Baum im Hintergrund zu haben mit den Informatikerinnen als Äpfel.

Nun begann meine Suche nach
passenden Informationen, jedoch kam
mir der Ansatz in den Kopf:

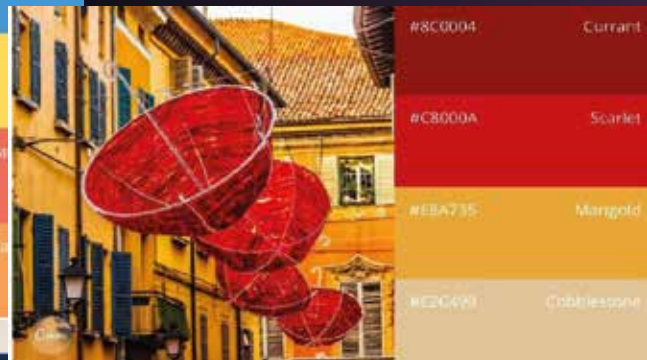

"Moment welchen Status
haben Informatikerinnen
überhaupt in der heutigen Gesellschaft?"

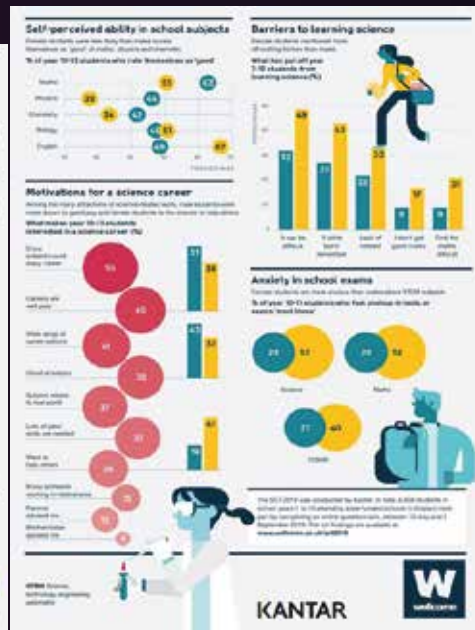

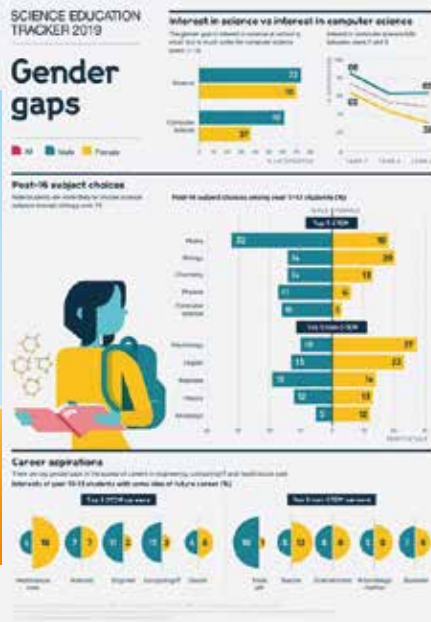

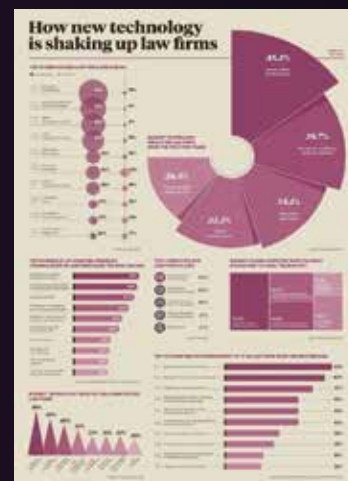

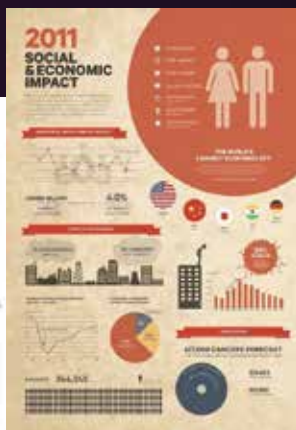

Mir gefiel dieser
Gedankengang viel mehr
und somit beschloss ich diese
weiter auszuarbeiten.

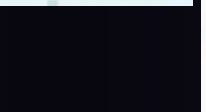

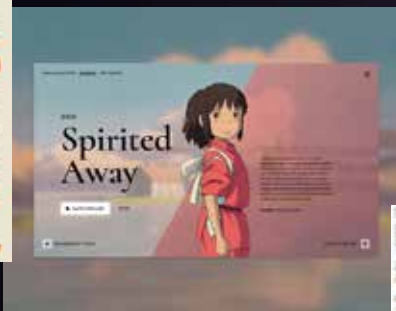

Moodboards

Zunächst habe ich mir Gedanken über die Farbpalette gemacht und anschließend um den Stil des Plakats

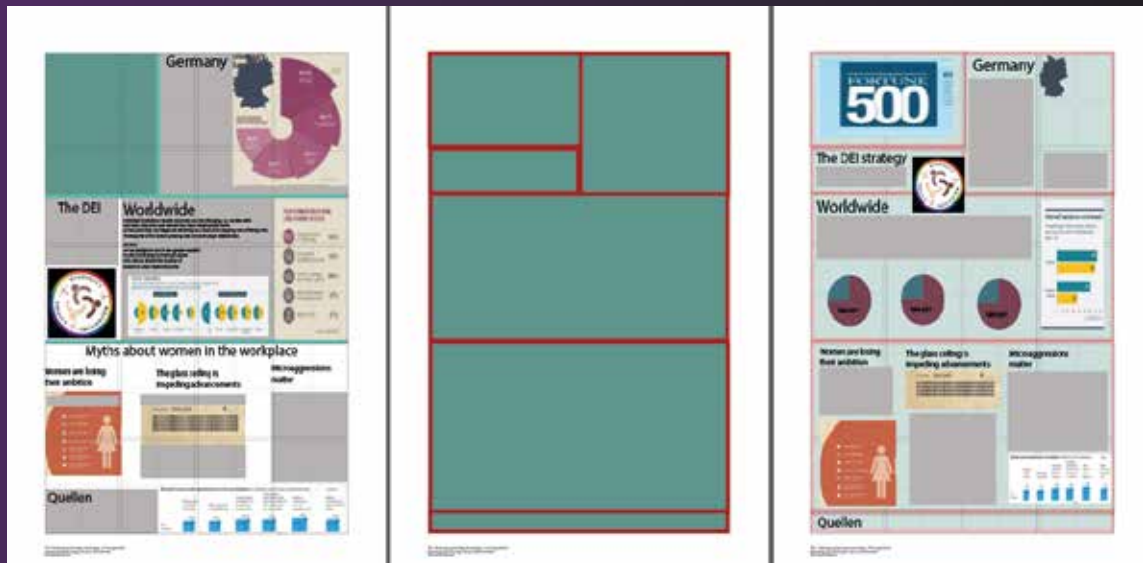

Umsetzungen

Die gefundenen Informationen
habe ich nun versucht
in einem Layout anzuordnen und Elemente
vom Moodboard einfließen zu lassen

The Silent Powerhouses: Women Making Waves in IT

Worldwide

Individual-level labour market outcomes are also diverging, i.e., workers with only basic education and women face lower employment levels. At the same time, real wages are declining as a result of an ongoing cost-of-living crisis. The majority of the fastest-growing roles are technology-related roles.

By 2030:

HP has pledged to reach 50% gender equality in roles at the director level and above and aims to double the number of women in senior leadership roles

Nationally occupied computing jobs (20%)

companies who prioritize women as part of their DEI programmes (79%)

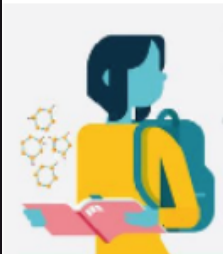

gender parity in the labour force during the pandemic (52.9%)

The DEI (diversity, equity, and inclusion) strategy

A coalition of more than 50 tech company executives, along with academics and DEI experts, has pledged to accelerate DEI progress and collaborated on an initiative to Catalyse Tech report.

Three of the five economies where women are reported to be the highest priority group for DEI programmes are in Europe. (Netherlands, Colombia, Italy)

Guidance for future leaders

“To succeed in your career, you need more than just computing skills. Don't get too caught up in the pursuit of the top score in your coursework and job skills through mentorship. It doesn't show your ability to be in use of these assets. Use data and facts to make informed decisions and set ambitious goals. Use the language of opportunities.”

Quellen

Germany

A chronic shortage of skilled IT professionals has persisted for several years. IT specialists' most valuable assets are their intellect and expertise. The IT industry is particularly open to lateral hiring, yet our decisions, work, thoughts, and actions depend on the participation of society as a whole.

It's often said that women are shaped by their environment and the choices that come with it.

Busting myths about women in the workplace through an interview

#1: Are Women losing their ambition?

The pandemic introduced a newfound flexibility to the working model, which became an enduring aspect of post-pandemic life for employees.

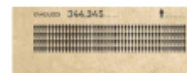

women in USA

90% Career is important to me
90% I am >50 and want to be promoted
75% I want to reach the highest level of my profession

#2: Is the glass ceiling impeding advancements?

90% Career is important to me

#3: Do Microaggressions matter?

“A lot of women can't speak up or share an opinion because they don't want to appear difficult or contrary to the discussion in the room.”

“You feel like if you're the first one of the best things that a colleague, a boss or woman can do is such a situation to reflect that microaggression. The global pandemic has demonstrated that the practice of remote work can have a more profound impact than previously anticipated. There are many tools to help create more inclusive and flexible work environments, which can help create more balanced experiences.”

personal experiences in the workplace, multiple of different forms

Microaggressions in the workplace, multiple of different forms

Ich habe mir zu dieser
Umsetzung Feedback
geben lassen, was
in das Endergebnis
eingeflossen ist.

Zwei große
Kritikpunkte waren
die unengen
an Informationen
und die rechtsbündigen
Absätze.

Somit hatte ich
nicht nur zu viele I
nformationen,
sondern auch viele,
die schwer zu
lesen waren.

WOMEN MAKING WAVES IN IT

THE SILENT POWERHOUSES

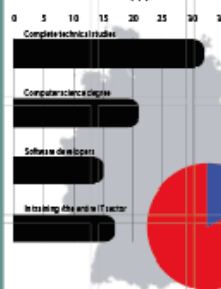

The DEI program consists of more than 30 tech company executives, along with academics and DEI experts, whose goal it is to accelerate the progress of Diversity, Equity and Inclusion in the market. Three of the five economies where women are reported to be the highest priority groups are located in Europe. Individual-level labour market outcomes are also diverging, i.e., workers with only basic education and women face lower employment levels. At the same time, real wages are declining as a result of an ongoing cost-of-living crisis. The majority of the fastest-growing roles are tech-closely-related roles. By 2022 HP pledged to reach 50% gender equality in roles at the director level and above while still aims to double the number of women in senior leadership roles [5] [4]

The DEI strategy

companies who prioritize women as part of their DEI programmes.

IT Status of women in Germany [2]

A chronic shortage of skilled IT professionals has persisted for several years. IT specialists' most valuable assets are their intellect and expertise. The IT industry is particularly open to lateral hiring, yet our decisions, work, thoughts, and actions depend on the participation of society as a whole. [3]

The values shown put Germany in 20th place out of 41 OECD and EU countries evaluated. [2]

Gender parity in the labour force during the pandemic [4]

Annual growth rate of women in large Tech-companies from 2019 to 2022P [4]

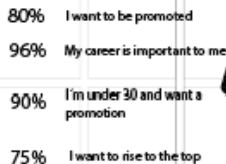

The TMT industry in North America has one of the highest percentages of women on boards with 26% [4]

Are Women losing their ambition?

The pandemic introduced a newfound flexibility to the working model, which became an enduring aspect of postpandemic life for employees. [2]

Women postpandemic being interviewed [2]

Is the glass ceiling impeding advancements?

A lot of times that criteria is based on the people who have sat in the seat before you. When women don't have the same degree of mentorship and sponsorship and support, they don't feel confident enough to go for it. [2]

For every 100 men who make progress, only 87 women do so as well [2]

Because of gender disparity in early promotions, men hold 60% of manager-level positions [7]

Do Microaggressions matter?

Personal experiences in the workplace are multiples [1] [2]

men

women

Multiplier of experiencing micro-aggressions

Others get credit for my ideas

My judgement is questioned

I have been mistaken for someone more junior

Others comment on my emotional state

I consider leaving the organization

I feel burned out

[2] https://www.mckinsey.com/featured-insights/workplace-diversity/microaggressions-at-work
[3] https://www.mckinsey.com/featured-insights/workplace-diversity/microaggressions-at-work

[4] https://www.mckinsey.com/featured-insights/workplace-diversity/microaggressions-at-work
[5] https://www.mckinsey.com/featured-insights/workplace-diversity/microaggressions-at-work
[6] https://www.mckinsey.com/featured-insights/workplace-diversity/microaggressions-at-work

Nearly a third of women say they don't speak up or share an opinion because they don't want to appear difficult or contrary. One of the best things that a colleague can do in such a situation is redirect that microaggression. The global pandemic has also demonstrated that the practice of remote work can have a more profound impact than previously anticipated where situations like this can be avoided. [2]

Also habe ich die Informationen
reduziert und nun die ersten
Designansätze umgesetzt

Ich habe mich hierbei
für einen futuristischen
lila-neon Stil entschieden.

Zudem habe ich restliche
Details eingebaut, um
Einheit zu schaffen.

WOMEN MAKING WAVES IN IT

Three of the five countries where women are reported to be the highest priority group are located in Europe. Individual-level labour market outcomes are also changing, i.e., women face lower employment levels and real wages are declining as a result of an ongoing trend of falling rates. But, the majority of the fastest-growing roles are technology-related roles. [1]

Women professionals being promoted in percent [2]

- 80 I want to be promoted
- 96 My career is important to me
- 90 I'm under 30 and want a promotion
- 75 I want to rise to the top

The IT industry in North America has one of the highest percentages of women on boards with 20% [6]

A chronic shortage of skilled IT professionals has persisted for several years. IT specialists' more valuable assets are their talents and expertise. The IT industry is particularly open to lifelong learning, innovation, work flexibility, and actions depend on the participation of society as a whole. [4]

Gender parity in the labour force during the pandemic [4]

Nationally or regionally computing jobs [4]

Annual growth rate of women in large tech companies from 2018 to 2020 [4]

Because of gender disparity in early promotions may hold 60% of manager-level positions [2]

IT Status of women in Germany [3]

The values shown put Germany in 20th place out of 41 OECD and EU countries evaluated. [3]
